VKC TRIAD Special Lecture

Everything You Ever Wanted to Know About Autism Surveillance But Were Afraid to Ask

Friday, November 18, 2016
10-11 a.m.
Room 241, VKC/OMC Building

The Autism and Developmental Disabilities Monitoring (ADDM) Network is the only collaborative network to track the number and characteristics of children with autism spectrum disorder (ASD) in multiple communities in the United States. The Centers for Disease Control & Prevention (CDC) encourages partners to use information from the ADDM Network in their local communities and across the country to move forward initiatives, policies, and research that help children with ASD.

Please join us as leadership from the CDC describe the history and methods of autism surveillance, answer questions about what the network has been able to accomplish, and where the network is heading.

There will be a 30-minute talk followed by a 30-minute question-and-answer session.

This lecture will also be available for live-streaming via Adobe Connect at http://vkc.adobeconnect.com/addm/.

Presenters:

- **Daisy Christensen, Ph.D.**
  Epidemiologist and Principal Investigator, Early Autism and Developmental Disabilities Monitoring Network

- **Jon Baio, Ed.S.**
  Epidemiologist and Principal Investigator, Autism and Developmental Disabilities Monitoring Network

The VKC TRIAD welcomes persons with disabilities. Contact kc@vanderbilt.edu for disability access information.
