Fall 2017 – Clinical & Translational Research in Intellectual and Developmental Disabilities

WED., SEPTEMBER 13, 2017

Introducing the Vanderbilt Center for Autism & Innovation

• Zachary Warren, Ph.D., Series Host, Associate Professor of Pediatrics and VKC TRIAD Executive Director

• Keivan Stassun, Ph.D., Stevenson Chair in Physics, Senior Associate Dean for Graduate Education and Research

• Timothy Vogus, Ph.D., Associate Professor of Organizational Behavior

• Julie Lounds Taylor, Ph.D., Assistant Professor of Special Education and VKC Investigator

Selected for Trans-Institutional Programs (TIPs) funding, this new initiative is aimed at developing an interdisciplinary model to enhance employment opportunities for individuals on the autism spectrum by identifying strengths and providing supportive/assistive technologies.

The series aims to promote cross-talk among behavioral/educational and biomedical researchers with the long-term goal of developing multimodal treatments for individuals with intellectual and developmental disabilities (IDD), including learning disabilities, genetic syndromes, and autism spectrum disorder.

The VKC welcomes participants with disabilities. Contact kc@vanderbilt.edu for disability access information.
