The IDD Toolkit is a website that provides information for the primary care of adults with intellectual and developmental disabilities. The Toolkit offers health care providers best-practice tools and information regarding specific medical and mental and behavioral health concerns of adults with intellectual and developmental disabilities, including resources for patients and families. The Toolkit is also accessible on smartphones and tablets.

Toolkit Contents

- **GENERAL ISSUES**

The IDD Toolkit was made possible by a grant from the Special Hope Foundation, Palo Alto, CA. The Toolkit is an adaptation for U.S. use of tools developed by the Developmental Disabilities Primary Care Initiative (2005-2014), Surrey Place Center, Toronto, Canada. The toolkit was adapted for U.S. use in a project funded by a grant from Special Hope Foundation to the Vanderbilt Kennedy Center for Excellence in Developmental Disabilities. Advisory Committee members included physicians from the Tennessee Department of Intellectual and Developmental Disabilities, Vanderbilt University, and the University of Tennessee Boling Center for Developmental Disabilities.
