Could your toddler with autism or suspected autism benefit from a language intervention?

Vanderbilt University, Department of Special Education
Vanderbilt Kennedy Center

Social Communication Intervention for Young Children with Autism or Suspected Autism

Your child may be eligible to participate if he/she:
- Has a diagnosis of an autism spectrum disorder or is suspected to have autism
- Is between 24 and 36 months

Participants will receive:
- Assessments of language and cognitive skills at no cost to you
- Evidence-based communication intervention at your home at no cost to you

What we will ask you to do:
- Come to Vanderbilt Kennedy Center for assessments 9 times across 12 months
- Fill out forms telling us about your child’s development
- Participate in learning and practicing intervention strategies with your child at home 2 times per week for 6 months
- Total time commitment is 12 months
