Learn about your child’s language and listening skills.
We invite *typically developing 5-7 year olds* to join our study on language development and how it relates to other thinking and listening abilities, like musical rhythm skills (no prior music experience needed). This research may help us understand new ways to improve language skills.

Participation involves:
- One screening visit and two study visits at Vanderbilt
- Language, hearing, and music testing
- Sitting still listening to sounds while wearing a damp stretchy cap and playing computer games
- Providing a saliva sample to measure DNA
- Results of standardized testing will be provided at no cost, and parents will receive up to $150 in gift cards.
