Skill Building for Infants with Down Syndrome

Who?
Infants 4- to 18-months of age with Down syndrome

What?
This research study consists of 4 visits to our lab, and parents will be asked to help their babies play with special toys at home. Participants will be paid $50 for completing the study.

Why?
Our goal is to encourage goal-directed behaviors and early problem solving skills during early infancy.

Where?
The VU Infant Learning Lab, located on Peabody campus at Vanderbilt University
