Robotics Study for Children with and without Autism Spectrum Disorder

This study looks at how children with Autism Spectrum Disorders (ASD) play computer games, solve puzzles, and talk to people.

We are looking for children who:

- Are 7 years to 17 years
- Do and do not have a diagnosis of Autism Spectrum Disorder* (*If yes, we will ask for a copy of the diagnostic report)
- Can use and understand spoken words
- Can to come to the Vanderbilt campus up to 6 separate days to participate (for about 1 hour each visit)

Participants will receive a $25 gift card at each visit for their time.

If you are interested in the study or have any questions, please contact Amy Swanson, M.A. at (615) 322-6533 or amy.r.swanson@vanderbilt.edu.

This study is conducted by Dr. Nilanjan Sarkar from the Department of Mechanical Engineering and Dr. Zachary Warren from TRIAD.
