The Child Language and Literacy Lab is looking for second and third graders to participate in a study to explore the interactions when children read to their parents.

Children from two groups can participate in the study:
- Second- and third-grade children with cochlear implant(s)
- Second- and third-grade children with typical hearing

What will your child do?
- Read to a parent
- Complete a speech, language, and literacy evaluation
- Participation will require one visit to our playroom at Vanderbilt and will take about two hours

You and your child will be compensated for participation.
