The two-volume tutoring manual contains information and materials needed to implement Number Rockets Tutoring. Book 2 contains all supporting materials, including worksheets, review sheets, flash cards, progress monitoring forms, and posters.

Book 1 (Scripts) is organized as follows:

Section 1: Topic Sequence
Section 2: Script to introduce the point system
Section 3: Scripts for tutoring lessons for the 17 topics
Section 4: Scripts for daily flash card activity

In Number Rockets Tutoring, tutoring sessions take place 3 times per week. Each session lasts 40 minutes and is structured as follows:

First 30 minutes: The tutor conducts the lesson following the script for that day. Lesson scripts are provided in Book 1. Supporting materials needed for each lesson are provided in Book 2 and must be photocopied for individual students.

Last 10 minutes: Students work on a flash card activity designed to increase fluency on addition and subtraction facts. Scripts for the first 8 days of flash card practice, and a laminated script for use after day 8, are included in Book 1. Flash cards are provided in Book 2.

Topics:
- Identifying and writing numbers
- Identifying more and less objects
- Sequencing numbers
- Using <, >, and = signs
- Skip counting by 10s, 5s, 2s
- Introduction to place value / place value / review
- Identifying operations
- Writing addition and subtraction sentences
- Addition and subtraction facts / review
- Two-digit addition / two-digit subtraction
- Missing addends
