If you are a parent or caregiver of a child between the ages of 10-15, you may be eligible to participate in a paid research study that may help you learn more about communicating with your child.

Interested parents or caregivers will be briefly interviewed by phone to determine eligibility. If eligible, you and your child will be asked to:

• Complete online surveys. Please note that the online surveys may take up to 1-1.5 hours to complete.
• Come to our office for a 4 hour visit that includes additional surveys, a brief screening of your child’s thinking skills, and a videotaped conversation with your child.

Families will receive $100 and a brief summary report of their children’s thinking skills.
