Autism Research

Now Recruiting:
Children (ages 5-7) with autism spectrum disorders and typically developing children. Must have normal or corrected-to-normal hearing and vision.

We will assess your child’s language and ask them to play a very simple alien-catching game on the computer while wearing a silly “alien-hunting hat.”
We are hoping to work with children with autism who show a wide range of language abilities, including children with autism who do not yet talk.

You will be compensated for your time.
