Volunteer for Research at Vanderbilt

We invite children and adolescents ages 10-13 years with autism OR typical development to be part of our research about pubertal development and social stress. We are also recruiting female siblings of children with autism who are 10-13 years.

Participation includes:
• Psychological testing and exam, 2-3 hours
• Social interaction and social evaluation, 2-3 hours
• Follow-up assessments 1 time a year for a total time commitment of 4 years

Participants will be compensated $20 and will receive a research letter with test results per completed visit.
